

New York State Perinatal Quality Collaborative

Obstetrical Improvement Project 2015 Quality Improvement Award

St. John's Episcopal Hospital - South Shore

Is a recipient of the *NYSPQC Obstetrical Improvement Project's 2015 Quality Improvement Award*. This award is given in recognition of the hard work and dedication of your facility's staff to improve outcomes for mothers and babies in New York State. As a participant in the **NYSPQC Obstetrical Improvement Project's Maternal Hemorrhage/Hypertension Initiative**, your facility ensured that at least 80% of women in labor were both evaluated for their risk of hemorrhage, and prior to discharge, received education on the signs and symptoms of postpartum pre-eclampsia. This is the highest level of achievement possible for this NYSPQC Obstetrical Improvement Project, and we commend your entire team for their exemplary work.
